

Exam & Procedure Chair Portfolio

Moving Care Forward

Lowest Total Cost of Ownership Guarantee*

It's what's
inside that
counts...

Are you challenged to reduce both capital and operational expenses without sacrificing staff and patient experience?

UMF Medical's Total Cost of Ownership Guarantee can have a major impact on your bottom line. We help reduce overall Total Cost of Ownership for power exam tables and procedure chairs with innovative technology that can meet or exceed your current clinical standards.

See our quick video on our Lowest Total Cost of Ownership Guarantee

HERE'S HOW

Life Cycle Management Program

Training/Product Optimization: Our strategic partnership with the MTMC Sales Team brings you more focused attention from discovery and demo to in-service and installation, and throughout the product life cycle.

Maintenance: UMF Medical has intentionally designed and engineered our power exam tables and procedure chairs not to require any preventative maintenance, helping to reduce the added monetary burden of yearly service checks.

Service & Repair

Receive a standard, best-in-industry, 3-year warranty on all power exam tables and procedure chairs.

Simply scan a QR code to register your equipment's warranty, receive additional product information or request live, technical support.

Experience our unparalleled five-star customer service.

Competitive & Flexible Acquisition Programs

Build the table you want! Offering three models in each series, we provide multiple features and accessories to meet your needs.

Purchase through your desired medical/surgical distributor of choice.

Maximize your GPO contract or develop local agreements to fit your need.

Standardize your exam table fleet over time with multi-year replacement schedules.

Delivery, Installation & Disposal

Our dedicated project manager will streamline your ordering process, quickly answer any questions, and create custom delivery and installation programs to fit your budget and needs.

Our project team can oversee your installation and quickly answer any questions that may arise.

Purchase UMF Medical exam tables or procedure chairs, and we will design a program to remove decommissioned product from your facility.

*Disclaimer: Facility must meet eligibility requirements as outlined in the LTCO contract. Learn more at www.umfmedical.com

Enhancing Head-to-Toe Infection Prevention in the Outpatient Setting

INFECTION PREVENTION MATTERS HERE!

UMF Medical's Exam and Procedure Chairs support head-to-toe infection prevention in the exam room with removable, seamless upholstery with PreFixx® Protective Finish and OneTouch WheelBase® System by making it easy to clean and disinfect on, around and under the equipment.

Infections cost the healthcare industry \$10 billion a year.

Source: CDC.org

Durable **upholstery with PreFixx® Protective Finish**, seamlessly constructed, and completely removable for enhanced infection prevention.

- › **Non-porous** and engineered for repeated **cleaning and disinfection**
- › Compatible with a broad range of common healthcare cleaners and disinfectants
- › **Resists staining**, discoloration, damage, scuffs, abrasions and bacteria growth
- › **Eco-preferred** and does not contain phthalates, fire retardants or antimicrobial additives

The OneTouch WheelBase® System allows a single staff member to effortlessly move the table with the touch of a pedal for cleaning the floor when bodily fluids drip or spills occur.

LEARN MORE

Outpatient visits continue to grow

Healthcare delivery has shifted to the outpatient setting while inpatient care has declined despite population growth, demographic shifts, and a rise in chronic illnesses in recent years.

Source: US National Library of Medicine, National Institutes of Health, Nov 2016

Outpatient Visits:

Hospital inpatient stays:

2005-2015:

Source: Deloitte Center for Health Solutions, Growth in Outpatient Care, 2018

Vulnerable patients rely on Outpatient Care

Vulnerable patient populations rely on frequent and intensive use of outpatient care to maintain or improve their health.... All healthcare settings, regardless of the level of care provided, must make infection prevention a priority.

Source: Centers for Disease Control, Guide to Infection Prevention for Outpatient Settings: Minimum Expectations for Safe Care, November 2015

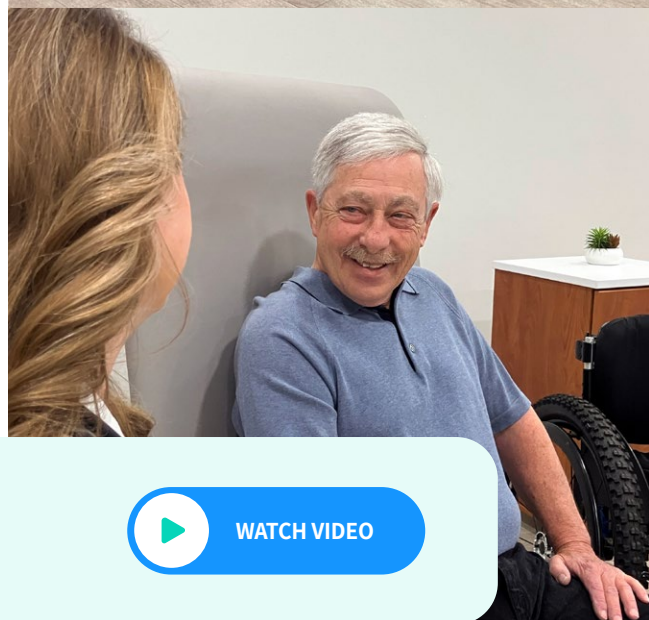

Infectious pathogens can spread in the Outpatient Setting

Infectious pathogens can be spread from secretions, excretions and blood of infected patients and are easily spread by sneezing, coughing, and oozing. And touching any of the surfaces contaminated by these pathogens and then touching your mouth, nose, or eyes is the most common way of acquiring these infections.

Source: US National Library of Medicine, National Institutes of Health, Patient Safety and Quality: An Evidence-Based Handbook for Nurses, Preventing Health Care-Associated Infections

UMF Medical provides exam room equipment that supports infection prevention initiatives

When making decisions for your changing patient population, make the choice that supports clinicians and patients with Head-to-Toe Infection Prevention Exam Table Solutions by UMF Medical. Make outpatient facilities a safer place for everyone.

Care & Cleaning

Use one of the following cleaners with a soft cloth or damp sponge. Rinse area with fresh water then dry with a clean, lint-free cloth.

Primary Recommended Cleaner

- › Formula 409 All-Purpose spray cleaner

Secondary Recommended Cleaners

- › Lysol Clean and Fresh Multi-Surface Cleaner (Reckitt Benckiser)
- › Lestoil Heavy Duty Cleaner (Clorox)
- › Mr. Clean / Flash Clean and Shine (Procter and Gamble)
- › Eco Touch All Purpose Premium Care
- › Mr. Clean Magic Eraser Original

For more difficult stains, contact UMF Medical Customer Service.

**All disinfectants and cleaning agents contain chemicals that degrade coated fabric upholstery to some extent. To promote a long product life, it is recommended that the PreFixx cleaning and maintenance protocol be employed regularly.*

***Recommended disinfectants are only recommended when following the disinfectant manufacturer's instructions for application, and inclusion in this document does not imply "fit for use." Customers should first determine if products are appropriate for use on their surfaces.*

Why do I need a demo?

At UMF Medical, we understand the importance of ensuring patient and staff safety, minimizing exam table downtime, and staying within the budget constraints that come with a large capital equipment purchase.

Live, online demonstrations are a fast, easy, and no-risk way to see the many features and benefits of UMF Medical's range of power exam tables and procedure chairs from the comfort of your office – in as little as 10 minutes!

We'll tailor your personal demo to suit your focus, timeframe and team needs.

- 1 Clinical
- 2 Biomedical
- 3 Financial

It's what's inside that counts.

See an exam table in action and discover the many practical features that go into the design of every UMF Medical exam table for enhanced infection prevention, minimized downtime and **lower total cost of ownership**.

1 Clinical: "It's just an exam table; I just want it to work."

Our power exam tables are more than just an exam table. In our clinical demo, discover how our exam tables:

- ✓ Help support your infection prevention initiatives
- ✓ Are designed for maximum uptime in your exam room
- ✓ Differ clinically
- ✓ Maximize ADA access and weight capacity for patients of all sizes and abilities
- ✓ Increase staff safety and retention
- ✓ Provide mobility with a touch of a pedal for workflow optimization
- ✓ Are backed by five-star customer care and more than 100 experienced representatives across the United States

2 Biomedical: "How can UMF Medical reduce my repair time and provide me support?"

Our power exam tables were designed to minimize downtime and simplify repairs. In our biomedical demo, discover:

- ✓ How our power exam tables are built and operate:
 - > Overall design process and intent for easily accessible service if needed
 - > Subframe and columns, including lift column operation
 - > Standardization of repair parts (actuators, control box, wiring schemes)
 - > Water ingress properties, IPX6
 - > Plug-and-play components
- ✓ Our Tool-free, removable, seamless upholstery with PreFixx® Protective Finish
- ✓ Our patented caster base for moving tables out of the exam room for quick repair
- ✓ How we eliminate the need for preventative maintenance
- ✓ The 50% reduction in labor to access the subframe through the skirts/shrouds
- ✓ Our service network that can be readily available to help you

3 Financial: "We already have an exam table vendor. Is it worth my time to consider UMF Medical exam tables?"

Our power exam tables can save you big over other manufacturers' power exam tables. In our financial demo, discover how our exam tables:

- ✓ **Deliver the Lowest Total Cost of Ownership, GUARANTEED, through:**
 - > GPO review of Local Vendor Contracts
 - > Large volume order discounts
 - > Three-year standard warranty
 - > NO preventative maintenance
 - > Multiple delivery options, including white glove
 - > 50% reduction in labor for accessing subframe for repair
- ✓ Can be available for clinical demonstrations and evaluations
- ✓ Can be repaired through our cost-effective service network to save you time and money

To schedule a demo for your team, contact your sales representative, call us at 800-638-5322 or email customerservice@umfmedical.com

Design Made Simple

Minimize Frustration, Maximize Value

Interior Design

We initiate each project with an empathetic approach tailored to the unique needs of crafted to suit the distinct requirements of healthcare institutions.

Project Management

Experience the support of a dedicated project coordinator as your professional guide throughout the process. Your vision becomes a shared mission, and every step is taken with a profound understanding of the importance it holds for you.

Procurement & Installation

We handle the acquisition of materials and safely store them while informing you of the installation process to ensure a seamless experience.

FusionFREEDOM™ Exam Chair with TruComfort™ Support Rails

More than 20 million adults experience mobility limitations, yet 60% of exam rooms still use fixed-height tables, preventing independent transfers for many wheelchair users.

The FusionFREEDOM™ Exam Chair addresses these challenges with an affordable, ADA-compliant solution, available with power and manual backrests. With a low seat height range of 17 inches, this chair accommodates 95% of wheelchair users who can independently transfer.

The TruComfort™ Support Rails add stability, reducing fall risks and improving patient and caregiver safety.

By offering a cost-effective, accessible solution, UMF Medical is helping healthcare providers deliver equitable, dignified care to all patients.

LibertyPRO™ Exam Chair

The LibertyPRO™ Exam Chair from UMF Medical is a high-performance, ADA-compliant solution designed for accessible, dignified care. With a low 17-inch seat height, manual or power back options, and TruComfort+™ Support Rails for more accurate blood pressure readings, LibertyPRO™ helps facilities deliver more equitable care while protecting staff and budget.

Clinical guidelines, including those from the American Heart Association, emphasize that a patient's arm should be fully supported at heart level during blood pressure measurement. Without this support, readings can be skewed, potentially leading to misdiagnosis or mistreatment¹. UMF Medical developed the TruComfort+ Support Rails™ to address this issue, providing integrated, stable arm support that promotes proper positioning during vitals collection, including blood pressure.

Top-to-Bottom Exam Table™ Assessment Checklist

**Ensuring patient Exam Tables
are intact, clean and safe for
patient use every time.**

Evaluate each exam table individually. If you answer “No” to one or two of the questions in this checklist, it is important to address each issue as quickly as possible. However, if you answer “No” to more than a couple issues or they cannot be easily addressed, you should consider replacing the exam table.

Institution Name:

Clinic/Office Name:

Address/Location:

Date Completed:

Completed by:

*If more than two no's, exam table should be marked as fail and requires remedial action

What you need to know about your exam tables

When was the last time you replaced your facility's exam tables or exam table upholstery? Have you taken the time to evaluate your exam tables to ensure they are safe for use by your patients and staff? In a time when infectious diseases are rapidly changing the healthcare landscape, it is more important than ever for your exam tables to help reduce healthcare-associated infections (HAIs) and not contribute to them.

According to the AHA 2018 Estimated Useful Lives of Depreciable Hospital Assets, it is recommended the typical exam table be replaced every 15 years. However, no two facilities or exam rooms are created equal. Some are used more often than others, and some are used for procedures that require longer, more physical use. No matter the situation, it's critical to assess your exam tables regularly to ensure they are enhancing the patient-provider experience and not hindering it.

Is the exam table Americans with Disabilities Act (ADA) accessible?

Is the exam table height adjustable in small, virtually continuous increments?

To reduce risk of injury for patients with mobility disabilities and provide the best medical care possible, it is critical for exam tables to be ADA accessible. Traditional fixed-height box exam tables can be difficult to access, posing safety risks for patients and staff. According to the ADA, exam table height between 17" and 19" from the floor is ideal for patients transferring to and from wheelchairs. It's also an ideal height for patients using walkers, rollators, and canes or who may need additional assistance sitting down on an exam table. In addition, the U.S. Access Board recommends exam tables be height adjustable in small, virtually continuous increments in order for clinicians to be able to position the patient properly to provide the best care possible.

Is the upholstered top free of holes, slits and gashes?

If your exam table's upholstery contains any holes, slits or gashes, your patients' health could be at risk! Even the tiniest hole in the upholstery can harbor bacteria, where no amount of hospital-grade cleaner can reach. To add to the issue, children often find it interesting to poke around in or tear at holes in the upholstery, making the damage worse and putting themselves at risk to picking up any bacteria that may linger. To reduce the risk of HAIs, it is important to replace or repair damaged upholstery as soon as possible.

Is the upholstered top free of stains and discoloration?

Even the most durable upholstery will break down over time, and this is especially true for upholstery that isn't properly maintained. Following the manufacturer's recommended cleaning and disinfecting instructions (IFU) will enable you to get the most life out of your exam table upholstery. In addition, stains and discoloration can negatively affect the patient experience within your facility. While the exam table may be clean and free from bacteria, stains and discoloration may send a different message.

Are the edges of the upholstery free of fraying material?

Each patient encounter increases the wear and table on the exam table. Over time, the edges of the upholstery may begin to wear and fray. This, too, can contribute to an increase in bacteria or other microorganisms on the exam table no matter how well it is clean and disinfected. It also creates an opportunity for jewelry, such as rings, or other clothing accessories to become caught and possibly injure patients or staff.

Is the stitching around the upholstered top intact?

Some upholstered tops have integrated stitching that can become snagged and cause additional opportunity for harboring bacteria or other microorganisms. Seamless upholstery provides less opportunity for this because the point at which the upholstery attaches to the top is hidden out of view. However, it is still important to ensure the stitching isn't loose and/or detaching from the exam table top.

Is the exam table top foam visible?

Just like holes, slits and gashes in the upholstery can pose health risks to your patients, so can protruding exam table foam. If exposed, the absorbent foam can become like a sponge for blood and body fluids, bacteria or other microorganisms. The upholstered top must be replaced in this instance.

Is the table base free from any fluid drips, stains and contamination?

Is the area between the upholstered top and table base free of liquid and debris?

Is the exam table and floor free of liquids or dried fluids?

Children vomit. Wounds ooze. Fluids spill. These substances can create an environment ripe for growing or harboring bacteria or other microorganisms and often end up on and under the exam table — out of sight and out of mind. Not only can these substances stain the exam table, but they are also a slip and fall hazard. When allowed to dry, they can lead to sticky, hard, discolored areas on the floor or exam table. As a result, the exam table may become stuck to the floor, and when moved for cleaning, relocation, or repair, it can cause thousands of dollars in damage to the facility and equipment.

Are the pedals, knobs, handles and controls intact, clean and functioning?

It's important to ensure all the pedals, knobs, handles and controls of the exam table are fully intact, clean and functioning properly. If handles or knobs are broken or missing, it could cause injury to patients or staff. Dirt from shoes and regular operation of the foot control or pedal may cause an accumulation of dust and dirt that can keep these items from functioning properly. In addition, if the exam table looks dirty or unkempt, it can negatively affect the overall patient experience.

Are all electrical cords free from damage?

It's no secret that damaged electrical cords can pose a safety risk. To avoid electrical shock to patients or staff, replace damaged cords immediately.
